

 **ALTUS**
SEAMLESS VIEWS

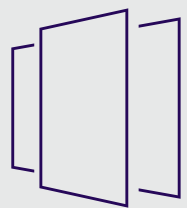

NOTHING BUT VIEWS

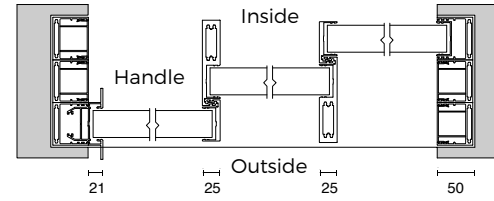

The ALTUS Slimline Sliding Door allows you to experience panoramic views, uninterrupted by unsightly, traditional framing.

With the outer frame concealable in your ceiling, walls and floor, the transition between indoors and out is seamless. Unlike traditional sliding doors, there are no visible door rails, and all rollers are integrated into the door frame for easy maintenance and replacement.

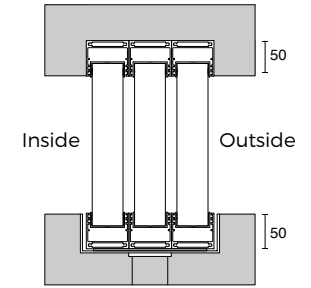

ALTUS offers the perfect combination of innovative engineering and stylish, modern design.
